

Sri Sri Sathya Sai Automobiles

POS User Guide — for shop staff and owner. Written in simple language.

1. What is this application?

This is your shop billing software. You can search parts, make bills, take Cash or UPI payment, print receipts, track daily cash in the drawer, and see sales reports. It works on computer, tablet, or phone (install from browser if needed).

2. Login

Who	Email	Password	What they can open
Owner (manager)	owner@sathyasai.local	123456*	Everything
Staff (counter)	staff@sathyasai.local	123456*	POS and Bills only

* Change these passwords in production. Owner should keep the owner login private.

3. Every working day — step by step

- Sign in.
- OPEN SHIFT — enter opening cash and opening UPI (see section 4).
- Bill customers on POS all day.
- Record cash expenses if money is taken from drawer (petrol, tea, etc.).
- At end of day: CLOSE SHIFT — count cash and UPI, download PDF summary.
- Sign out.

You cannot bill on POS until the shift is open. Only one open shift per day.

4. Opening cash and opening UPI — what do they mean?

When you start the day, the app asks for two numbers. These are your STARTING balances before any sale today.

Opening cash (¹)

Physical notes and coins in the cash drawer right now. Example: you counted and enter 5000.

Opening UPI (¹)

Money already sitting in your UPI account (PhonePe / GPay / bank UPI) before sales today. Example: balance shows ₹2,000 — enter 2000. This is NOT today's UPI sales; it is what you have.

Why both?

At closing, the app calculates what cash and UPI SHOULD be (opening + sales) and compares it to what you actually counted. If numbers match, your tally is correct.

5. POS — billing a customer

- Search box: type part name or code (e.g. ACTIVA filter). Click a result or press Enter.
- Quantity and discount: change qty; staff discount on each line max 20%. Owner can give more.
- Customer phone (optional): enter 10-digit mobile; name saved for credit customers.
- Payment: choose Cash, UPI, or Credit (customer pays later).
- Print & complete — prints bill and finishes sale.
- Complete (no bill) — finishes sale without printing.

Button / field	Meaning
Cash	Customer paid with notes/coins
UPI	Customer paid via PhonePe/GPay/etc.
Credit	Customer will pay later; needs phone number
Line discount	Discount % on one item
Bill discount	Discount % on whole bill (owner or allowed staff)

6. Cash expense

Top bar !' Expense. Use when cash is taken OUT of the drawer (not for buying short note. This reduces expected cash at closing.

7. Close shift — end of day

Top bar !' Close shift. Enter what you actually counted:

- Counted physical cash — notes/coins in drawer now.
- Actual UPI balance — check PhonePe/GPay/bank app total.

Expected cash

Opening cash + Cash sales today " Cash expenses today.

Expected UPI

Opening UPI + UPI sales today.

Variance

Difference between counted and expected. Zero = perfect. Positive = extra money. Negative = short. Small differences can happen; investigate large ones.

After you submit, a PDF downloads automatically. It is also saved in the app (reports).

8. Bills page (Staff & Owner)

View past customer bills. Search by bill number or customer phone.

Filter	Shows
Today	Bills for today (India time)
7 days	Last 7 days
All	All saved bills

Column on list	Meaning
Bill number	e.g. SSA-0001
Time / customer	When sold; walk-in or customer name
Amount	Total bill value
Payment	CASH / UPI / CREDIT

Tap a bill to open details, download PDF/Excel, or reprint.

9. Owner — Dashboard

Card / section	Meaning
Stock cost value	Total purchase cost of all stock
Retail value	Total if all stock sold at selling price
Today revenue	All sales today (cash + UPI + credit)
Today gross profit	Sales minus item cost (today)
Cash / UPI / Credit today	Breakdown by payment type
Low stock	Parts below minimum level
Dead stock	Parts in stock but never sold
Saved end-of-day reports	Past closing PDFs — Download again
Register audit	Past days: open cash, cash/UPI variance

10. Owner — Reports page

Sales charts and comparisons. Use Refresh to update.

Section	Meaning
Sales this month	Total sales in current calendar month
Expenses this month	Cash taken from drawer this month
Net this month	Sales minus expenses this month
Selected period	Pick dates; see daily sales chart
Payment mix	How much was Cash vs UPI vs Credit
Week / month comparison	This period vs previous period
Net profit chart	Month over month after expenses

11. Owner — Inventory

Column	Meaning
Part no.	Supplier code
Name	Part description
Stock	Quantity in shop now
Cost	Purchase price (owner only)
Sell	Price on bill
Min alert	Warn when stock falls below this
Rack	Shelf location

12. Owner — Purchases & Excel import

Purchases: enter supplier invoices manually. Excel import: bulk load Kumar / Gayatri / Kokila invoice files. Posted purchases increase stock.

13. Offline use

If internet stops, you can still bill — sales save on the device and sync when internet returns. Header shows Offline. Open shift once while online so parts are loaded.

14. Quick daily checklist

Time	Action
Morning	Login !' Open shift !' enter opening cash & UPI
During day	POS billing; Expense if cash taken out
Evening	Close shift !' count cash & UPI !' save PDF
Any time	Bills page to find old receipts

15. Help

If bills or stock look wrong: tap Refresh on that page. If still wrong, contact the person who manages Supabase / owner account. Do not share owner login with staff.
